About us

Lanmeco Flooring is an integrated manufacturer specializing in the R&D, production and export of flooring products. Our core product range covers SPC rigid flooring, PVC flooring, WPC flooring and laminate flooring.

To deliver a full-set supply experience for global distributors and project clients, we have expand our product portfolio with matching wall panels, custom skirting boards and display boards. Customers can source all Flooring & Wall decorative materials in one stop with consistent designs, which greatly cuts down communication cost and logistics expenditure from multiple vendors.

We are equipped with high-tech production machines imported from Germany, our products are widely exported to the USA, Canada, Germany, Australia, South America, South Africa, the Middle East, Europe, Southeast Asia and other regions. Many overseas clients have signed exclusive regional agency agreements with us for long-term cooperative development.

With more than ten years of experience in decorative building materials, we have developed from a single flooring manufacturer into a one-stop supplier of integrated wall and floor decoration materials. Centered on clients' full-scene decoration demands.
We stick to our service target — "One-stop Sourcing, Consistent Matching Supply", providing efficient, worry-free and cost-effective complete supply chain solutions for all global partners.

SPC Flooring

A healthy, durable, and safe solution made from virgin materials. Certified formaldehyde-free, odor-free, and antibacterial, it offers wear, scratch, and stain resistance as well as slip and fire safety. The precise click system enables fast DIY installation, and full customization is available for size, color, surface texture, edge treatment, and UV coating.

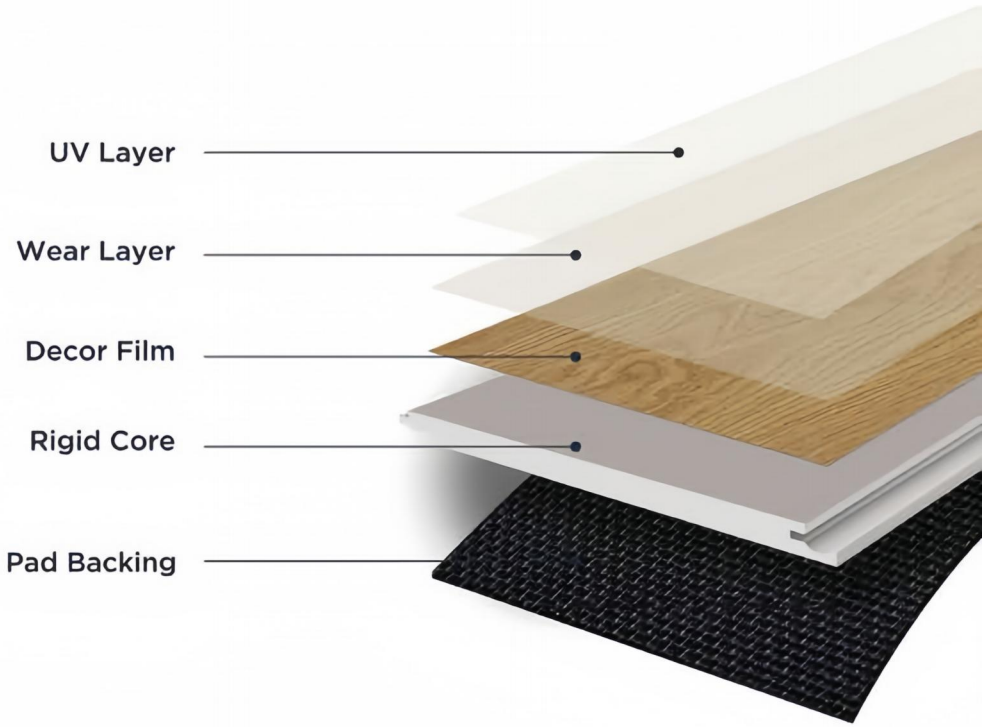
Multi-length&width



LSPC

Flooring

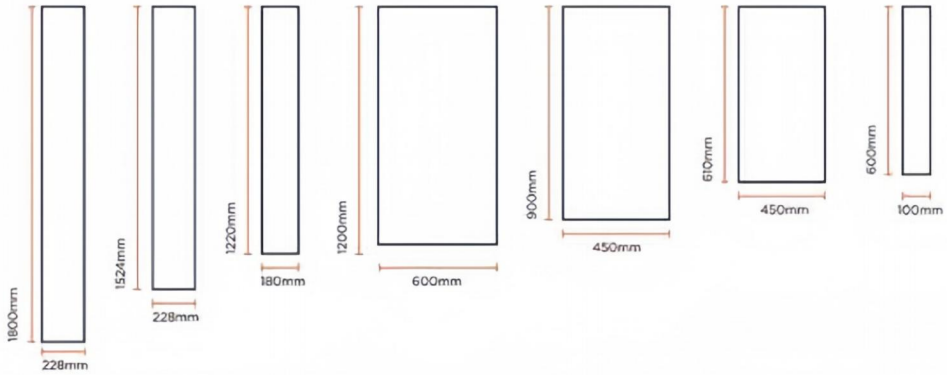
Utilizes advanced stone-plastic composite technology, offering a lightweight structure that is 20% lighter than traditional SPC, reducing freight costs and simplifying installation. Made with virgin materials, suitable for education, medical, commercial, and residential applications.

Lightweight

Comfortable underfoot

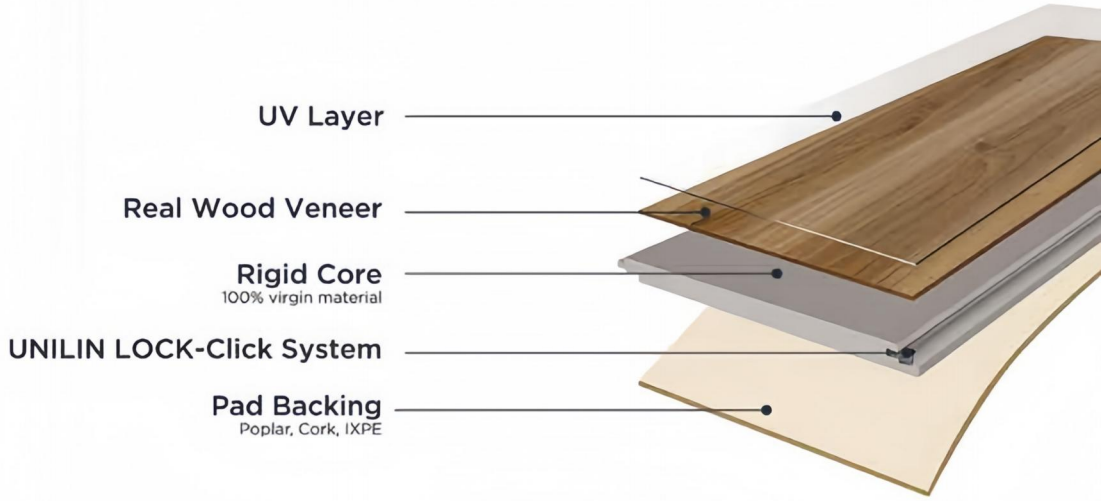
Plank Size

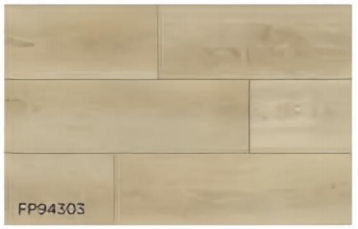
Customized sizes are available upon request.

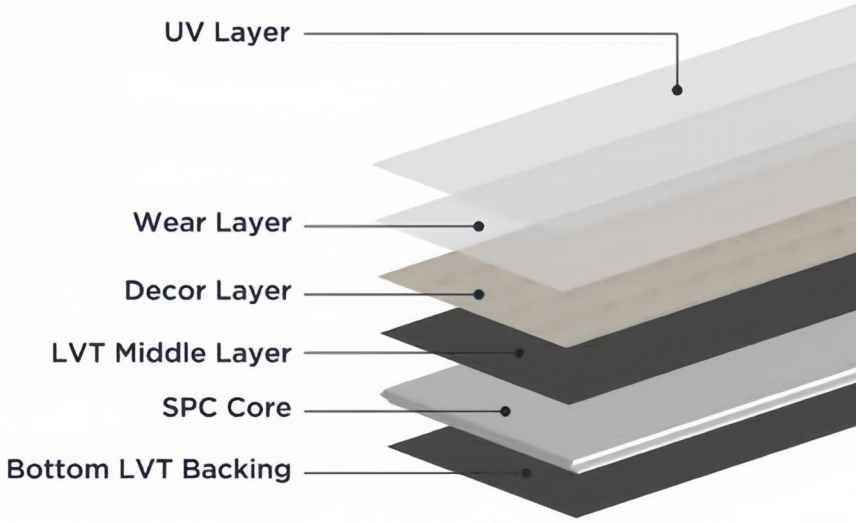


VSPC

VSPC flooring is an eco-friendly veneer stone-plastic composite floor. It is waterproof, formaldehyde-free, fireproof and slip-resistant. Featuring high stability, it never deforms under humidity and temperature changes. With realistic wood & stone texture, it adopts click-lock installation without glue. Wear-resistant, easy to clean, ideal for residential and commercial use.







ABA | AB | BA

ABA Flooring

SPC ABA(AB BA) features a three-layer co-extruded structure that enhances dimensional stability and sound insulation. The ABA technology provides a balanced core that reduces warping and improves installation efficiency. It combines durability with lightweight properties, making it an ideal choice for both residential and commercial projects.

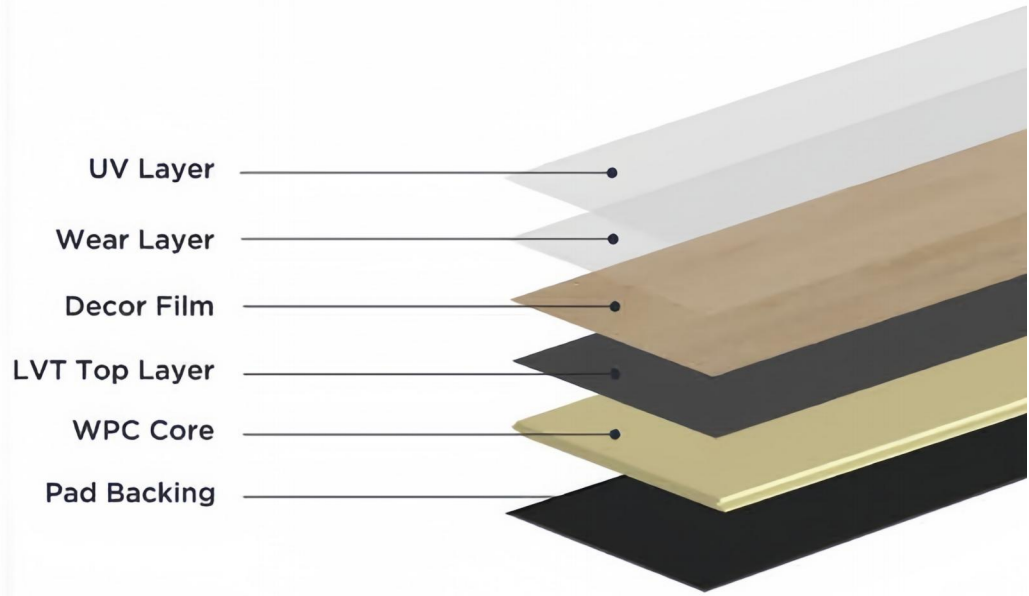
Stable Structure

Quick-installation

Quiet Step

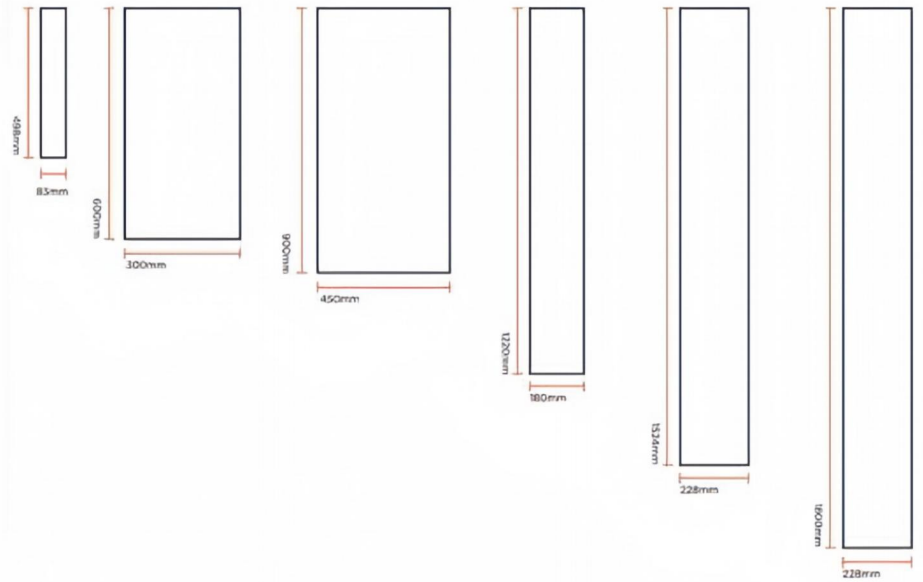
WPC Flooring

WPC flooring combines luxury and high quality with excellent sound-proof performance and comfortable footfeel. Made with a wood-plastic composite core, it offers superior waterproof properties. Our company maintains a complete production line from LVT core material to hot pressing, ensuring consistent quality. Ideal for residential and commercial spaces where comfort and durability are essential.

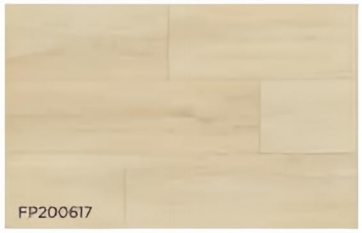


Plank Size

Customized sizes are available upon request.



Decor Color Selection



EIR

Flooring

SPC | WPC

Realistic Texture | Anti-Slip | Easy To Clean

EIR features advanced Embossed-in-Register surface treatment, which precisely matches the texture to the printed pattern to create an authentic wood grain appearance. This technology enhances visual realism while maintaining the waterproof and durable properties of WPC/SPC flooring. All patterns and colors are carefully selected and exclusively developed by our company.

FP113901

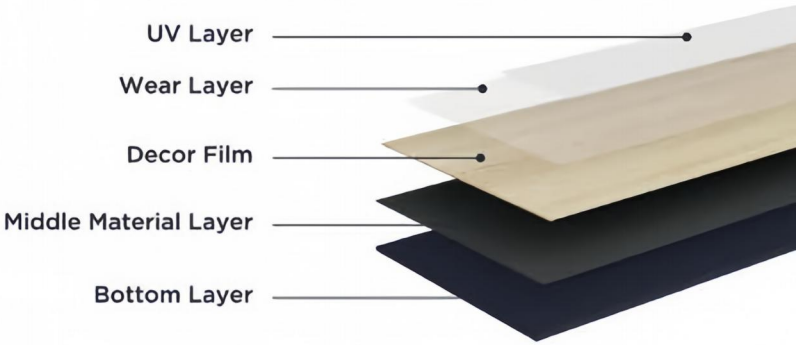
FP113905

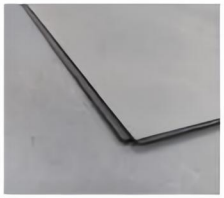
FP113907

FP113909

LVT Flooring

This high-quality vinyl flooring is designed to mimic natural materials such as wood or stone. It includes options like dry back, loose lay, and click vinyl floors, all while offering enhanced durability and practicality.





Click

Dry Back

Self-Adhesive

Loose Lay

Loose Lay features a glue-free installation system where planks stay in place by their own weight and friction against the subfloor. This allows for fast installation and easy replacement of individual planks without adhesive residue. Perfect for applications requiring quick setup, temporary installations, or spaces where adhesive use is restricted.

Direct installation without glue or tools can be directly installed on:

Tiled floor

Wood floors

Cement floor

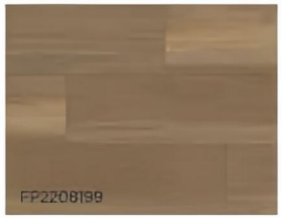
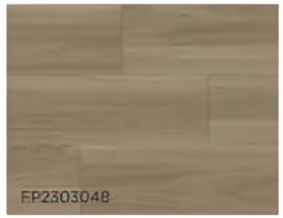
FP81727

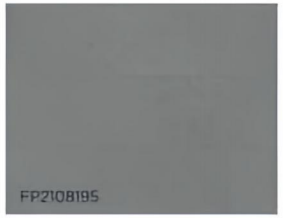
Chevron

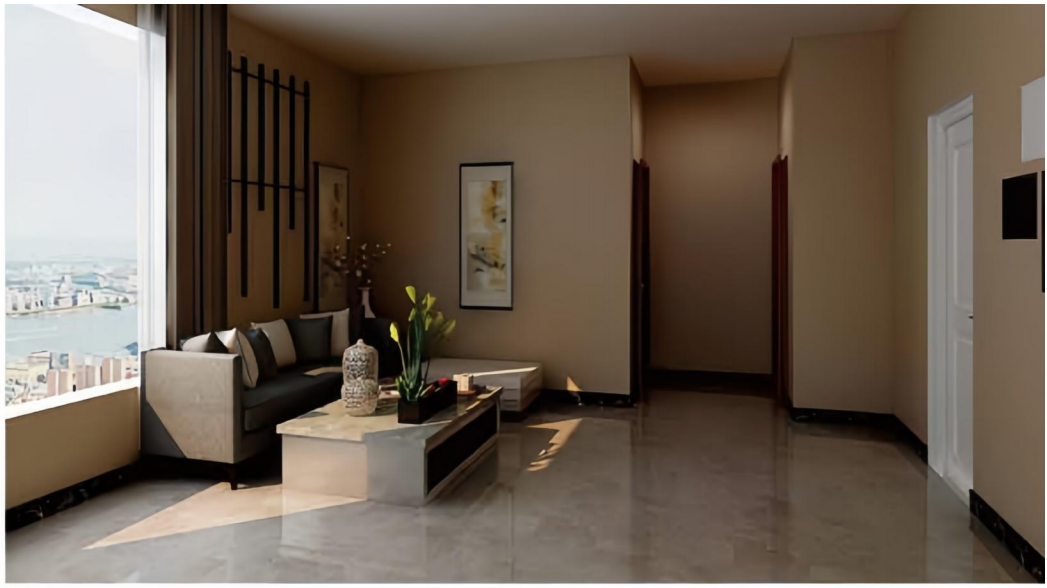
Chevron features a distinctive fishbone pattern that creates a dynamic and elegant visual effect. This design brings a high-end decorative appeal to any space, mimicking the look of traditional parquet flooring.

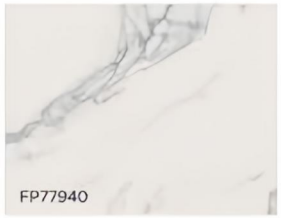
Decor Color Selection

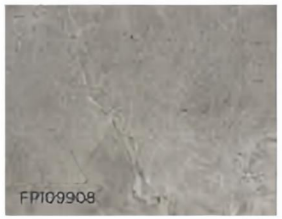


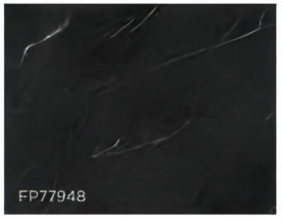


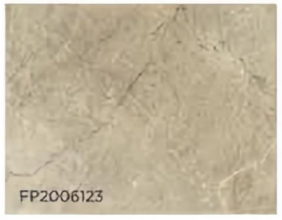












Beautiful Styling | Edge Closing | Eco-Friendly | Easy Installation

Molding

Home decorative trims are used for edge closing and styling of walls, ceilings, floors, doors, and windows, effectively enhancing spatial layering and overall aesthetics. They are durable, waterproof, moisture-proof, eco-friendly and easy to install. Suitable for living rooms, bedrooms, kitchens, bathrooms, and even the entire house, these trims have become an essential accessory for modern decoration.

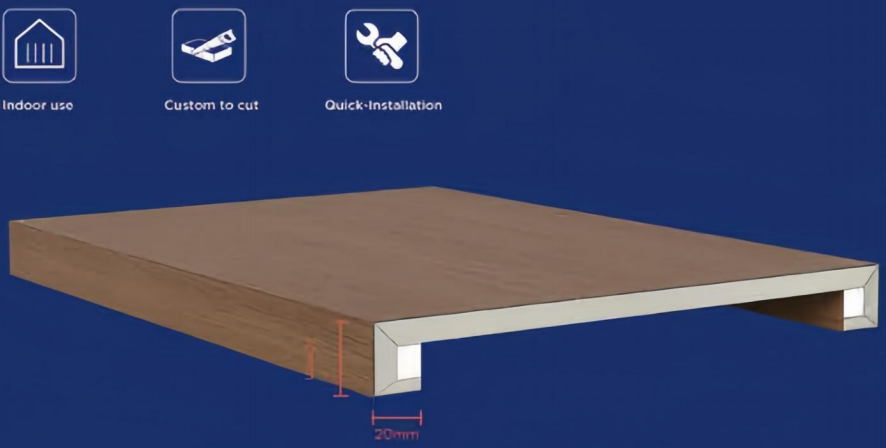
Double-side Bending

Double-side bending products are manufactured via high-precision synchronous bending technology for both ends. The integrated one-piece forming ensures symmetrical structure, balanced strength and reliable performance, making them ideal for stair treads, frames, support structures and other industrial/construction applications.



Size can be customized.

Flexible MDF Wall Panel

Flexible MDF wall panels are manufactured from premium wood fibers under high temperature and pressure, forming a durable and bendable MDF core. Designed for curved walls, columns, arches, and custom decorative shapes, they are ideal for modern interior applications.

Internal use

Portable installation

Featuring large-format continuous textures with seamless jointing for a refined, integrated wall finish. The food-grade high-gloss or matte PET surface offers scratch resistance, anti-yellowing performance, waterproof protection, and easy maintenance. Its eco-friendly substrate is moisture-resistant and deformation-resistant, while the modular design ensures fast installation. Ideal for premium residential and commercial interior spaces.

WPC Wall Panel

WPC Wall Panels are made with a wood-plastic composite core that is eco-friendly, formaldehyde-free, moisture-resistant, mold-resistant, and highly durable. Featuring an elegant slat design, they also provide sound absorption and a scratch-resistant, easy-clean surface. With quick installation and low maintenance, they are ideal for residential, hotel, and office interiors.

Bathroom
Wall Panel

Bathroom Wall Panel is a new type of eco-friendly wall decoration material, mainly made of natural stone powder and eco-friendly PVC resin, formed by high-temperature extrusion and precision molding. It combines the stability of stone and the flexibility of polymer materials, with multiple advantages such as waterproof, wear resistance, environmental protection and quick installation, widely used in residential and commercial spaces.

Suitable for 99% of wall surfaces.

Display Rack

Our display racks support comprehensive personalized customization and can be tailor-made according to your requirements for size, structure, appearance and application scenarios. Our experienced design team professionally provides CAD drawings with thorough communication throughout the process. Production will only start after strict sample making, verification and final confirmation. Every detail is precisely tailored to your demands, making customization more reliable and the final presentation more impressive.
